

Eric Spidle

Grand Rapids, MI | ericspidledev@gmail.com | 810-441-2712 | [Portfolio Website](#)

Skills

- **Languages & Frameworks:** C, C++, Rust, Python, JavaScript, HTML/CSS, Qt/QML, React
- **Platforms & OS:** Linux, seL4, U-Boot

Professional Experience

Dornerworks Ltd.

Grand Rapids, MI

Embedded Systems Engineer II

Jan 2026 – Present

- Reworked a Linux TSN Ethernet driver from a bridged to directly connected architecture in C, adding hardware timestamping support and enabling PTP synchronization via ptp4l for customer hardware requirements
- Built a PCIe DMA driver in C supporting multiple DMA engines, achieving 1.8 Gbps throughput for 6MB packet transfers across a video frame pipeline

Embedded Systems Engineer I

Nov 2023 – Dec 2025

- Leveraged AWS CloudFront and Ruby to optimize delivery of large OTA update files, improving download performance for customers in 50+ countries
- Served as tech lead for modernization and refactoring of legacy smart washer and dryer software, utilizing C++ and Qt to improve code quality and maintainability
- Ported an XHCI host USB driver from U-Boot to the seL4 microkernel enabling 5 new devices to be available in a virtualized environment
- Developed VirtIO ethernet drivers for seL4, abstracting hardware dependencies and enabling portable software deployment across 5+ hardware configurations
- Designed a light version of a drag-and-drop seL4 VM configuration app in Rust and React, scoping features for external trial use and showcases
- Implemented a virtual UART driver in C for seL4, eliminating silent failure debugging scenarios and providing a consistent output interface across platforms

Embedded Systems Engineer Co-op

May 2021 – Dec 2022

- Spearheaded effort to boot first ever seL4 virtualized guest on RISC-V hardware
- Built a Python-based hardware management tool using the GitLab API, enabling a 10-person distributed team to reserve and remotely deploy test images across 10+ shared hardware boards
- Developed an seL4 SD card driver enabling up to 32GB of persistent storage accessible concurrently across multiple virtual machines

Rocket Mortgage

Detroit, MI (Remote)

Software Engineering Intern

May 2020 – Sep 2020

- Collaborated with business analysts to update MVC components in ASP.NET, adapting to evolving business requirements and maintaining reliable data exchange between Rocket Mortgage and 30+ Appraisal Management Companies

Education

Grand Valley State University

B.S.E Computer Engineering, Magna Cum Laude
GPA: 3.86 | Tau Beta Pi Engineering Honor Society

Grand Rapids, MI

Sep 2018 – Aug 2023
